EDUCATION

Benha University | 2023–2028
Faculty of Engineering at Shubra
Communications and Computers Engineering Program (CCEP)
Year 2
GPA 2.58

SKILLS

- **Programming**
 - **Electronics**
 - **Power Point**
 - **Multi-Tasking**
 - **Teamwork**
-

COURSES

- **Huawei HCIA–Cloud Computing v5**
 - **OOP with JAVA**
-

PROJECTS

- **Bank account managment system:**

Description: Developed a Python–based system to manage bank accounts, allowing users to deposit, withdraw, and check their account balance. The system ensures secure and efficient handling of transactions.

Technologies/Skills Used: Python, File Handling, Problem Solving, Basic Banking Operations

- **Web Application for Steganography with QR Key with QR Key:**

Description: Developed a Python–based web application that allows users to embed and extract hidden text or audio within images using a QR code as the key. The application ensures secure data hiding and retrieval.

Technologies/Skills Used: Python, Web Development, Steganography, QR Code Integration, Frontend & Backend Development

- **Variable Positive & Negative Power Supply:**

Description: Designed and built a power supply that outputs adjustable positive and negative voltages, allowing control over voltage levels for different electronic circuits

Technologies/Skills Used: Electronics, Circuit Design, Testing, Voltage Regulation

- **Intruder Detection Alarm Circuit:**

Description: Developed an electronic circuit that triggers an alarm when an intruder passes by, enhancing basic security measures

Technologies/Skills Used: Electronics, Sensors, Circuit Design, Alarm Systems
